### Cross UI – Multi-Framework

May 2025 - Present

Component Library (Personal Project)

Tehran, Iran

CrossUI: The Unified, Modular Development Ecosystem for Web, Mobile, and Backend

CrossUI revolutionizes modern application development by seamlessly integrating leading JavaScript frameworks such as React, Vue, NativeScript, NestJS, and more. Its flexible, modular architecture empowers developers to build scalable projects with ease, while built-in support for popular UI frameworks like Bootstrap and Material UI accelerates the creation of high-quality products. The robust CrossUI CLI streamlines project initiation and management across multi-framework environments, embodying the philosophy of 'Accelerated Development Without Compromising Code Quality'.
